1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 5, line 1, change "claim 4" to --claim 1--.

An attempt to contact Mr. Hsu was made to confirm the above amendment, but only e-mail address was provided & the PTO seems to have changed the access protocols for e-mail such that neither the examiner's previous ID & password, nor that which was suggested by the computer would work, so no contact was possible. However, as claim 5 is dependant on canceled claim 4, but the limitations of claim 4 were put into the independent claim 1, it is clear from context that the intent is for dependence of claim 5 from claim 1, hence as the remain outstanding problem in this case, the above examiner's amendment is made.

2. The following is an examiner's statement of reasons for allowance: The combination of using both the O-plasma treatment & the claimed B wt.%, is not seen in the cited prior art, providing the combination of advantages of the better adhesion during processing due to the O-plasma, but the removability discussed by applicant in their 6/15/04 response.

The Korean patent to Park, cited by applicant in the 10/29/04 IDS, has a nitride liner treated with oxygen plasma, then BPSG deposited thereon, but the examiner found no evidence of disclosure of concentrations of B. Suzuki et al (2004/0171224 A1) is cited as of interest for its insulating layers, where fig.14, [0103], [0154] & [0175] are noted to teach [B] at values less than claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
